WHO WE ARE

APAGCoSyst Electronic Control Systems is a dynamic, Swiss, global electronics & lighting technology firm

- Technology solutions for **automotive, medical, and industrial**
- **Design, develop, and manufacture** lighting and control units
- 500+ team across 9 locations

- **Guided by our CREDO** with the 5Cs:
Consideration, **C**ommitment, **C**reativity, **C**ohesion, **C**haracter
- **High quality** with single digit **PPM** levels
- Certified ISO 9001, ISO 14001 (environment), ISO 45001, IATF 16949 (automotive), and familiar with ISO 26262 (functional safety) relevant control units

We specialize in

- **Lighting** (interior & exterior design and peripheral function lighting modules)
- **ECUs** (comfort/luxury function smart actors, smart sensors, and human machine interfaces)
- **Industrial Automation** (customized automation solutions for electronics industry)
- **EMS** (electronic manufacturing services – industrialization & build to print)

• Who we are

- Overview
- CREDO & values
- Corporate group
- Global presence
- Leadership

• Our Business

- Special Services
- Our Production
- Our Team

We have a quality & service focus – which combined with design & industrialisation prowess is a key ingredient to success

Long-term relationships, not having lost a customer since 2012	Guided by our CREDO with its 5Cs	Dynamic and entrepreneurial but grounded in structured processes that ensure high quality
Full-service R&D (including hardware & embedded software development, lighting/optical & mechanical designs, and testing)	Our customers bring an idea, we provide a product.	Flexible, custom solutions in PRODUCTION (DfX, proprietary tooling/automation and test systems development and production)
Design, development partner & contract manufacturer that deeply understands electronics	Driven to Deliver Excellence	Automotive & medical supplier with safety critical product experience that understands quality, reliability, and delivery

	1. CONSIDERATION <ul style="list-style-type: none">• Understand other's perspectives and points of view• Embrace diversity in thought, age, gender, ethnicity, or any other personal orientation• Be honest and authentic• Treat people as we would want to be treated• Empower people
	2. COMMITMENT <ul style="list-style-type: none">• Give our best• Be reliable• Be fully present and involved in meetings• Make it happen and stay till it is done• Provide a consistency of service to customers, suppliers and colleagues
	3. CREATIVITY <ul style="list-style-type: none">• Think beyond our work about how we work, why, and about what we can improve• Have a positive attitude• Inspire others to think beyond their work• Encourage open sharing and feedback• Look at the root cause of issues and opportunities
	4. COHESION <ul style="list-style-type: none">• Work toward the common goal and benefit• Be vulnerable in truly showing ourselves• Really care about our colleagues and our relationship with them• Trust and be trustworthy• Make the workplace happy for us, our teams, and our colleagues beyond our teams
	5. CHARACTER <ul style="list-style-type: none">• Have a customer focus• Create output we are proud to author• Take responsibility for our work• Help rather than blame or accuse• Breathe quality – work in the same way whether or not somebody is watching

• Who we are

- Overview
- CREDO & values
- Corporate group
- Global presence
- Leadership

• Our Business

- Special Services
- Our Production

• Our Team

Operationally independent, our investors are well-respected, and values-driven corporate groups with diverse interests – giving us financial stability

KPL INTERNATIONAL LIMITED

• Who we are

- Overview
- CREDO & values
- Corporate group
- Global presence
- Leadership

• Our Business

- Special Services
- Our Production

• Our Team

Our strength comes from the ANAND Group, one of India's leading automotive systems companies

• Who we are

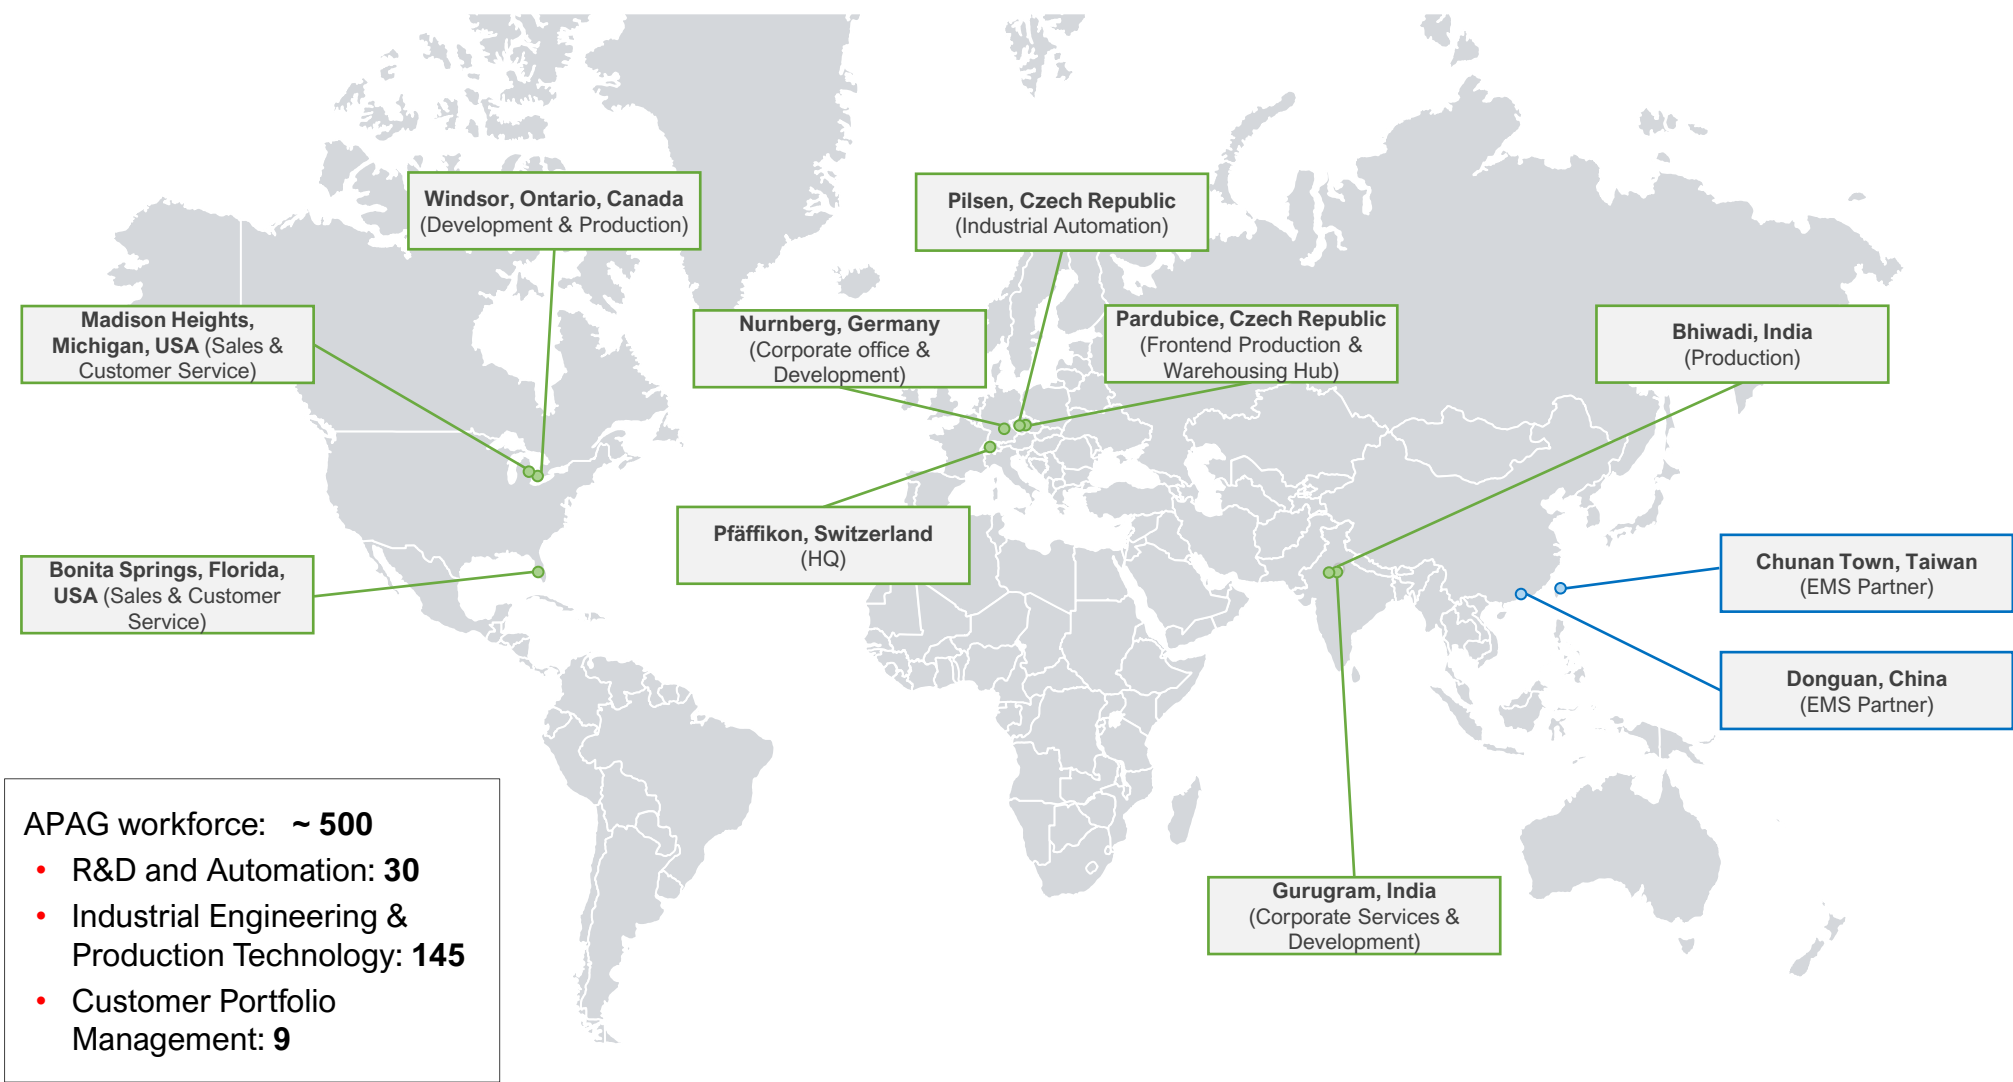

- Overview
- CREDO & values
- Corporate group
- Global presence
- Leadership

• Our Business

- Special Services
- Our Production

• Our Team

Driven by market demand and talent availability, we have established a global presence to best serve global customers

• Who we are

- Overview
- CREDO & values
- Corporate group
- Global presence
- Leadership

• Our Business

- Special Services
- Our Production
- Our Team

We are led by a diverse team with varied experience but an equally high passion to deliver excellence

Anand Kanoria
Managing Director

Experience and Expertise:

- Since 2013 at APAGCoSyst
- Over 10 years in the automotive industry
- Prior roles in consulting (McKinsey & Co, Accenture) and product strategy (Volkswagen of America)

Strategic Insight and Leadership:

Extensive experience in organizational strategy, financial and supply chain consulting, and product strategy, driving business growth and innovation.

Dr. Tiemo Bückmann
President Operations - R&D, Manufacturing, Automation and Portfolio Management

Experience and Expertise:

- Since 2018 at APAGCoSyst
- Over 10 years in the automotive sector (OEM, EDL, and supplier)
- Specializing in automotive development, lighting and optics, serial production, and operational leadership

Scientific and Technical Leadership:

Extensive expertise in research, innovation, and advanced technology, with a strong technical foundation that supports complex business decisions and strategic direction in automotive operations.

Laurentius Michielse
President Corporate Services - Finance, HR and Procurement

Experience and Expertise:

- Since 2017 at APAGCoSyst and in the automotive industry
- Over 25 years of experience as a CFO across various industries
- Operations leadership experience in the industrial sector

Strategic Financial Leadership:

Extensive expertise in financial management and operational strategy, driving business success through economic insights and leadership in complex industries.

• Who we are

- Global presence
- Leadership

• Our Business

• Special Services

• Our Production

• Our Team

OUR BUSINESS

We divide our business into four units – Lighting, ECU, Industrial Automation and Electronics Manufacturing

Lighting

- ✓ Interior & exterior feature illumination
- ✓ Comfort functional lighting

Design & Development,
Manufacturing concepts and
production

Electronic Control Unit (ECU)

- ✓ Smart actor/HMI control
- ✓ Smart sensor control
- ✓ Advance Lighting control
- ✓ Multi-function gateway

Design & Development,
Manufacturing concepts and
production

Industrial Automation

- ✓ In-line laser depaneling
- ✓ Thermal pad cut + pick and place
- ✓ Customised automation solutions
- ✓ for electronics industry

Design for automation,
Design and integration

Electronic Manufacturing Service (EMS)

- ✓ High quality PCB assembly
- ✓ Box build and assembly services

Design for Manufacturing
consulting and production

• Who we are

• Our Business

• Business units

• Our niche

• Where we are headed

• How we work

• Our customers

• R&D capabilities

• Manufacturing capabilities

• Special Services

• Our Production

• Our Team

Our in-house Industrial Automation team are experts in designing and building customized assembly lines for high-volume production

A growing team of experts

- Established in 2018
- 11 projects brought to life (as per November 2022)
- Support available from 3 locations in Europe and North America
- 1 patent granted + 1 pending

A safe choice

- Only proofed & approved designs are offered externally
- All our designs are CE and UL/CSA compliant

We understand your EMS products

- Design department located in APAG Development center (DE)
- Machine development in close cooperation with our EMS factories
- Machines tailored to the needs of our EMS activity

A diverse set of tools & expertise

- Mechanical Design: SolidWorks Premium, Catia
- Programming: Siemens TIA Portal v15 to v17
- Wiring: SolidWorks Electrical
- Testing: Labview, TRI, Canoe
- AOI: Cognex In-Sight Explorer, In-Sight Vision Suite
- Welding, soldering, machining available in-house

APAGCoSyst 2026 – Our services, quality focus, values, and forward-looking plans

- Our Production
- Our Team

Our development capabilities prepare us for range of projects (1/2)

International Project Management

- International based Project management (Europe, North America, India), 24h support
- Agile Project management is standard, and will be tailored to customer needs
- Automotive SPICE conformity process (ISO/IEC 15504) to level 2
- DOORS requirements management
- Automotive standards are respected (Phase model / V-Model / FMEA)
- Development and industrialization are linked from the project start allowing short project timings
- DFM guidelines are respected from the start of concept.
- Global representatives for each customer ensure customized support around the globe

Testing & Validation

- Light-laboratory and strong test-lab cooperation
- System testing (HIL, Teststand, LabVIEW, LabWindows CVI, Vector)
- Environmental testing, HIS, MISRA
- Series test system design & implementation
- EMC Testing
- EVM with Partner Laboratories

Functional Safety

- Experience with safety relevant design based on ISO 26262
- ASIL conformity with project responsibility up to level B

- Who we are
- Our Business
 - Business units
 - Our niche
 - Where we are headed
 - How we work
 - Our customers
 - R&D capabilities
 - Manufacturing capabilities
- Special Services
- Our Production
- Our Team

Our development capabilities prepare us for range of projects (2/2)

Hardware Engineering

- Digital and analogue circuit design
- Circuit simulation and calculation (e.g. Pspice)
- PCB Design (PADS)
- Prototype design, small-lot production on serial equipment possible
- 24h support possible due to worldwide project team
- AI based circuit design under evaluation
- Power electronics motor control
- Gateway electronics for inter system communication
- Light control units for exterior and interior light functions incl. ADAS
- FPGA/ASIC-Design in VHDL-AMS
- Microcontroller (up to 32 bit) and dual core processors
- Communication interfaces (CAN, LIN, bluetooth, embedded wireless, Ethernet and Flexray)

Software Engineering

- ASPICE level 2 compliance
- Programming and integration of operating systems, drivers, diagnostic modules and bus interfaces
- Analysis, design, implementation (UML, C)
- Integration of customer Software possible
- Integration, verification, validation (Black/White box, Units-test)
- SW lifecycle service
- Full AUTOSAR 3.x and 4.x BSW integration
- Embedded ASR conforming application development
- Configuration or operating software (VB or Visual Studio VC++)

Optical & Mechanical Design 3D

- Light-fiber concepts & light-guide designs accounting for uniformity, intensity, & heat management
- Housing concepts for electronic assemblies including connectors
- Potting and sealing options available
- Thermal integration / dissipation with simulation
- Inhouse light simulations (Light tools)
- Mechanical interface (Catia, Solidworks)
 - Smaller exterior optics design
 - Larger interior designs
 - Light laboratory
 - Lightguide concepts
 - Freeform optics
 - Integrated systems (optics, thermic and mechanic)

• Who we are

• Our Business

• Business units

• Our niche

• Where we are headed

• How we work

• Our customers

• R&D capabilities

• Manufacturing capabilities

• Special Services

• Our Production

• Our Team

We are equipped to manufacture your high-quality electro-mechanical modules

Component Technology

- Surface Mount Technology (SMT) with zero board handling (Fuji) – Solder Paste Inspection (SPI) in all SMT lines (Koh Young), 2 or 3D Automated Optical Inspection (AOI) in all SMT lines (Koh Young, Viscom)
- Pressfit (Action pin) Tyco
- Standard manual through hole (THT)
- Ball Grid Arrays (BGA), Pin Grid Arrays (PGA), Quad-Flat No leads packages (QFN), Quad Flat Packages (QFP)

Soldering Technology

- Selective soldering, nitrogen assisted wave soldering, nitrogen assisted reflow soldering, robotic & hand soldering, laser soldering

Product finishing

- Conformal coating/varnishing with IR and UV curing
- Poly-urethane and silicone potting/sealing
- Overmolding and underfill

Testing

- AOI (Automated Optical Inspection), X-Ray, ICT (In-Circuit Testing), FUT (Functional Testing), ECT(End Control Testing), screening

Printed Circuit Board handling capability

- Single layer and multilayer PCBs, rigid, semi-flexible & flexible PCBs
- Unique LASER printed QR code on every PCB and panel to ensure component level traceability during process and post production

Production Flexibility

- High and mid volume lot sizes, flexible variants based on size and shape of PCBs
- Mechanical housing/harness assembly
- Box build & finishing assembly (with customized automation for high volumes)

Warehousing

- Dust-controlled, ESD , pressurized stockroom
- Paternoster tower with automated identification for component storage (Kardex)
- Component repackaging from paper boxes prior to production hall entry

Industrial Automation

- SolidWorks Mechanical (design), Electrical (schematics), Composer (Documentation), TreeHouse (export)
- Siemens Simatic Professional (PLC programming)

Traceability & Quality Management
 100% automated interlocking traceability system (iTAC)
 Dedicated internal quality management team

SPECIAL SERVICES

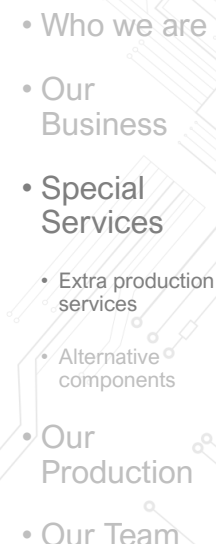

- Based on extensive research through the global supplier network
- Includes recommendations/alternatives following the business award

RFQ-16-616		GERBER REVIEW	
APAC co sm yst CUSTOMER SERVICE CENTER			
Observation	Comment	Layer	Proposal
	C70 thermal relief (top copper layer)	top copper layer	
	R02 reference pad on a PCB border	top copper layer	remove the trace
	R02 pad on the right side has no thermal relief	top copper layer	add thermal relief to the pad design
	TP103 test point is thermal relief on top copper layer	thermal relief can be cancelled	
	D103 Via is taking the heat from the leads pin	top copper layer	

Page 1

If you cannot fix them on time under the constraint the lead route the trace on the layer to have no direct copper

- 
- Who we are
 - Our Business
 - Special Services
 - Extra production services
 - Alternative components
 - Our Production
 - Our Team

Our expert R&D team supports our customers with design-in of alternative components (such as μ P) available on the market

- Alternative components are available on the market but require sophisticated, customer released engineering processes
- Benefit for the customer: lower overall cost, due to the sufficient availability of the alternative components (e.g. semiconductors) on the market, and therefore no need to source from expensive brokers
- Our suggested alternative components are based on customer released list and use customer certified engineering processes incl. DFMEA, PFMEA, Obsolete Material Mgt, Validation

OUR PRODUCTION

Industry 4.0 – Welcome to APAGCoSyst's smart factory

Building

- Lean production including 5S workplaces
- Dust controlled pressurized production hall (VDA 19-2 production)
- Temperature and humidity-controlled production and warehouse
- ESD Flooring
- ESD conformant workplaces and production equipment
- Segmented production for minimization of contamination
- Ionic contamination control
- No cardboard/open paper in production
- All automated Doors

Smart manufacturing processes

- Component level traceability with process interlocking
- Live feedback to operators about performance and quality
- Live link of production output and quality
- Customised industrial robot at each key process
- Six-Sigma production with ~100% test coverage for automotive
- Dynamically planned preventive maintenance

Smart manufacturing monitoring

- In house designed software (SES0) for tracking and monitoring
- Customisable digital boards for every sector of the manufacturing site preventing information loss
- Real-time Production Data: MES provides real-time data of production models, station, project quality inspection, and automatic alert and recording of production issues
- Real-time Production Warnings: When actual production deviates from the set target and produces abnormality, UMS will give real-time feedback and alerts to managers.
- Real-time Repair tracking: Using the live data, executive staff can resolve issues arising in a timely manner with transparent overview tracking minute by minute actions
- Daily internal reviews of production including automatic action plan tracking in

Our focus: 1) Low cost, 2) High quality, 3) High transparency, 4) High consistency

Our results: World class quality: PPM = 3 ppm (2021) Yield rate over 98%

We have access to state-of-the-art production facilities in Czech Republic (ACZ), Canada (ACA) and India (AIN) (1/3)

Pardubice, Czech Republic

Location is an established industrial site

- 17,000 sqm of land
- 4,500 sqm of production + stock
- 1,200 sqm of administrative space

With existing detailed plans for further 1,300 sqm of production + stock in phase III (phase II expansion already happened)

Pilsen, Czech Republic

Location is a focused hall in an industrial site focused on assembly of custom, proprietary automated assembly lines

Windsor, Canada

Location is a one-storey 3,000 sqm facility near the US border, just across the river from the automotive center of Detroit.

Bhiwadi, India

Located in the RIICO Industrial Area. Emphasizes environmentally sustainable operations, including being water-neutral, and uses advanced technologies like AI and machine learning.

- Who we are
- Our Business
- Special Services
- Our Production
 - Industry 4.0
 - Facilities
 - Available technologies
- Our Team

We have access to state-of-the-art production facilities in Czech Republic (ACZ), Canada (ACA) and India (AIN) (2/3)

Production conditions

- Pressurised for dust repulsion
- ESD access controlled & secure
- State-of-the-art ESD flooring
- Temperature & humidity controlled
- Technical cleanliness in conformity with VDA19.2

Traceability technology

- Laser marking
- Automatic labelling line

Surface mount technology

- Separated SMT area with independent temperature & humidity control
- 9 high-speed state-of-the-art SMT lines (with existing space for 6 more)
 - Laser DMX coding
 - Fuji NXT, NXT II & NXT III pick & place machines
 - 10 zone Rehm reflow ovens
 - Closed loop Koh Young 3D SPI
 - In-line Viscom/Koh Young (2D, 3D) AOI
 - 1 line with X-ray for BGA production
- No manual handling through entire SMT process
- 1 line dedicated to sample & small series
- 100% component level traceability integrated via equipment software, plant-wide interlocking traceability system & corporate ERP
- Depanelling options: milling, V-cut, stamping, pizza cutter, laser cutter
- Separate milling room with independent vacuum cleaning for dust protection

We have access to state-of-the-art production facilities in Czech Republic (ACZ), Canada (ACA) and India (AIN) (3/3)

Through hole technology

- Wave soldering & Selective soldering & Laser soldering
- Press pin technology: Tyco action pins & Autosplice pins

Product finishing & testing technology

- Conformal coating/varnishing line with IR and UV curing
- State-of-the-art testing area with AOI THT, ICT Tester, Functional testers

Assembly technology

- Injection moulding
- Custom assembly lines for high-volume production including placement soldering heat staking, testing and automated packaging

Warehouse technology

- Pressurised, temperature & humidity controlled warehouse
- Paternoster vertical component storage tower connected to interlocking traceability system and production planning system

Industrial automation technology and toolchain

- SolidWorks Mechanical (design), Electrical (schematics), Composer (Documentation), TreeHouse (export)
- Siemens Simatic Professional (PLC programming)
- Cognex In-Sight and Designer suites (camera inspection)
- Machine FMEA - APIS
- Manual milling, drilling and sawing machines available
- Independent production facility for line/tooling manufacturing
